# REFRAKTOR

**Kev G & Collin Claus**

Available from  
[www.rubikscubemagician.co.uk](http://www.rubikscubemagician.co.uk)

**Price: £27.95 - £77.95**

If you love Rubik Cube magic then Refraktor is a must. It is not one effect, it's a whole course which teaches moves, forces, solves and lots of routines with a regular Rubik Cube. No gimmicked cubes are required.

The video explanations are very clear and run through each section step by step. All the tutorials are easily accessible in your account on the Refraktor web site.

I will say that I have been practising some of the material on volume one for some time. I am no expert when it comes to the cube. I can solve it, but not quickly. This means that when learning the various moves, etc every time I go wrong I have to then reset the cube which becomes time consuming, so be prepared to put in the hours to get the most out of it.

There really is a lot of stuff to get stuck into. Various packages are available to buy from the purchase of each volume individually to the Megatron Bundle which contains everything. Volume 1 which features the 446 Mix really is great and a good place to start if you are not sure.

If you are a confident cuber you will absolutely love Refraktor. **PS**

**WHAT'S HOT:** amazing amount of material available

**WHAT'S NOT:** be prepared to put in the time if you are not a quick cuber.

**RATING:** 81%

0-20% = VERY POOR 21-40% = A BIT WEAK 41-60% = REASONABLE 61-80% = GOOD 81-100% = EXCELLENT
